PRODUCT DESCRIPTION AND APPLICATION

Airfoil's Metal Reducers (RED), proudly Australian Made, are meticulously crafted from premium 0.55mm Australian Galvanised sheet metal and are available in all standard sizes.

The Metal Reducers are crafted to decrease a larger duct diameter to a smaller one without affecting other dimensions within Airfoil's Y-Piece fittings (Y), Branch Take Off fittings (BTO), and Double Branch Take Off fittings (DBTO). Alternatively, the Reducer can be paired with any of Airfoil's Supply Air or Return Air Plenum Boxes to attain a different duct diameter spigot size.
