## SQUARE TO SQUARE REDUCER NECK SRN

### PRODUCT DESCRIPTION AND APPLICATION

Airfoil's Square to Square Reducer Neck (SRN), proudly Australian Made, is meticulously crafted from 0.55-gauge galvanised steel to meet the highest standards. With a matte black paint finish, it blends discreetly once installed. Available in various squared sizes, this Reducer Neck is commonly found within Airfoil's Grille range. However, its primary application is in Airfoil's Supply Air Diffusion Range, such as the Louvred Face Diffuser (LFD).

Here, it seamlessly attaches to the rear of the Grille, simplifying the connection of Airfoil's Supply Air Insulated Cushion Box (ICB). The Square to Square Reducer Neck features 40mm turned up angles within its core, allowing easy fitting of the Cushion Box. Alternatively, it's also suitable for Return Air applications. Versatile for both commercial and domestic settings, the SRN offers flexibility across different environments.
