

Horizontal air discharge

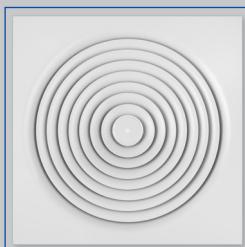

With plenum box

With connecting frame

With butterfly damper

Square diffuser face

Ceiling diffusers

Type ADLR

For horizontal radial supply air discharge, with fixed air control blades – aluminium diffuser face

Circular and square ceiling diffusers for radial air discharge, for high comfort levels, ideal integration into suspended ceilings

- Nominal sizes 1, 2, 3, 4, 5, 6, 7, 8
- Volume flow rate range 20 – 650 l/s or 72 – 2340 m³/h
- Circular or square diffuser face
- Diffuser face made of aluminium with anodised finish
- For supply and extract air
- For variable and constant volume flows
- For suspended continuous plasterboard or grid ceilings
- High induction results in a rapid reduction of the temperature difference and airflow velocity

Optional equipment and accessories

- Exposed diffuser face available in RAL CLASSIC colours
- Horizontal or vertical duct connection
- Plenum box with cord-operated damper blade and pressure tap

Application

Application

- Type ADLR ceiling diffusers are used as supply air or extract air diffusers for comfort zones
- Attractive design element for building owners and architects with demanding aesthetic requirements
- Horizontal radial supply air discharge for mixed flow ventilation
- High induction results in a rapid reduction of the temperature difference and airflow velocity (supply air variant)
- For variable and constant volume flows
- For supply air to room air temperature differences from –10 to +10 K
- For room heights up to 4 m (lower edge of suspended ceiling)

- For suspended continuous plasterboard or grid ceilings

Special characteristics

- Horizontal radial supply air discharge
- Diffuser face made of aluminium
- For suspended continuous plasterboard or grid ceilings
- Horizontal or vertical duct connection

Nominal sizes

- Circular diffuser face: 244, 300, 356, 412, 468, 542, 598, 654
- Square diffuser face: 593, 598, 618, 623
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Description

Variant

- Circular diffuser face
- Square diffuser face

- Standard cross bar

Connection

- A: Diffuser face only
- AR: Vertical duct connection, with connecting frame
- C: Vertical duct connection with butterfly damper
- ZV: Vertical duct connection, with plenum box for supply air
- AV: Vertical duct connection, with plenum box for extract air
- ZH: Horizontal duct connection, with plenum box for supply air
- AH: Horizontal duct connection, with plenum box for extract air

- Duct cross bar

- Lip seal

Materials and surfaces

- Diffuser face made of aluminium
- Connecting frame and butterfly damper made of coated sheet steel
- Plenum box made of galvanised sheet steel
- Lip seal made of rubber
- Attachments are dip coated RAL 9005, jet black
- Diffuser face powder-coated RAL 9010, pure white
- P1: Powder-coated, RAL CLASSIC colour

Standards and guidelines

- Sound power level of the air-regenerated noise measured according to EN ISO 5135

Maintenance

- Maintenance-free as construction and materials are not subject to wear
- Inspection and cleaning to VDI 6022

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

Accessories

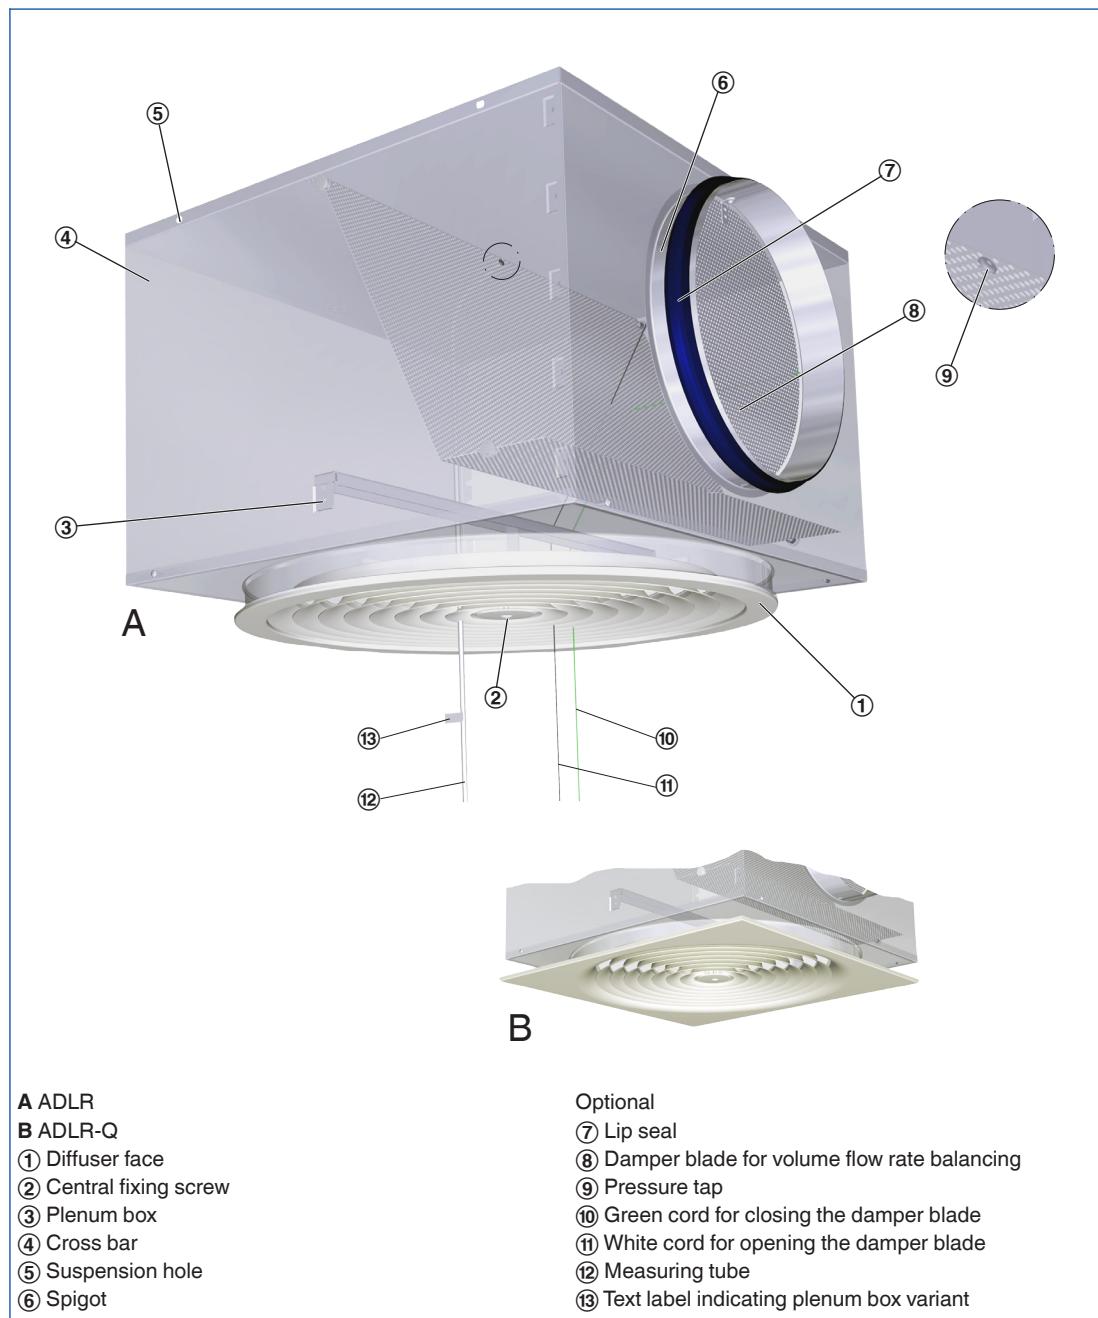

Functional description

Ceiling diffusers direct the air from air conditioning systems into the room. The resulting airflow induces high levels of room air, thereby rapidly reducing the airflow velocity and the temperature difference between supply air and room air. Ceiling diffusers allow for large volume flow rates. The result is a mixed flow ventilation in comfort zones, with good overall room ventilation, creating

only very little turbulence in the occupied zone. Type ADLR ceiling diffusers have fixed blades. Horizontal air discharge is radial. The supply air to room air temperature difference may range from -10 to +10 K.

To give rooms an aesthetic, uniform look, Type ADLR diffusers may also be used for extract air.

Schematic illustration of the ADLR, with plenum box for horizontal duct connection

Air patterns

Horizontal air discharge

Nominal sizes – circular diffuser face	244, 300, 356, 412, 468, 542, 598, 654 mm
Nominal sizes – square diffuser face	593, 598, 618, 623 mm
Nominal sizes – diffuser	1, 2, 3, 4, 5, 6, 7, 8
Minimum volume flow rate	20 – 230 l/s or 72 – 828 m ³ /h
Maximum volume flow rate, with L_{WA} ≈ 50 dB(A)	515 – 650 l/s or 1854 – 2340 m ³ /h
Supply air to room air temperature difference	-10 to +10 K

Quick sizing tables provide a good overview of the volume flow rates and corresponding sound power levels and differential pressures.

The maximum volume flow rates apply to a sound power level of approx. 50 dB (A).

Exact values for all parameters can be determined with our Easy Product Finder design programme.

This specification text describes the general properties of the product. Texts for variants can be generated with our Easy Product Finder design programme.

Ceiling diffusers with square or circular diffuser face. Supply air and extract air variants for comfort zones. Diffuser face with fixed air control blades for horizontal radial air discharge. For installation into all types of suspended ceilings.

Ready-to-install component which consists of the diffuser face with fixed, concentric air control blades, a diffuser front frame with perimeter seal and connecting frame, a damper blade or a plenum box.

Diffuser face suitable for central screw fixing.
Spigot suitable for circular ducts to EN 1506 or EN 13180.

Sound power level of the air-regenerated noise measured according to EN ISO 5135.

Special characteristics

- Horizontal radial supply air discharge
- Diffuser face made of aluminium
- For suspended continuous plasterboard or grid ceilings
- Horizontal or vertical duct connection

Materials and surfaces

- Diffuser face made of aluminium
- Connecting frame and butterfly damper made of coated sheet steel
- Plenum box made of galvanised sheet steel
- Lip seal made of rubber

- Attachments are dip coated RAL 9005, jet black
- Diffuser face powder-coated RAL 9010, pure white
- P1: Powder-coated, RAL CLASSIC colour

Technical data

- Nominal sizes – circular diffuser face: 244, 300, 356, 412, 468, 542, 598, 654 mm
- Nominal sizes – square diffuser face: 593, 598, 618, 623 mm
- Nominal sizes – diffuser: 1, 2, 3, 4, 5, 6, 7, 8
- Minimum volume flow rate: 20 – 230 l/s or 72 – 828 m³/h
- Maximum volume flow rate, with $L_{WA} \approx 50$ dB(A): 515 – 650 l/s or 1854 – 2340 m³/h
- Supply air to room air temperature difference: -10 to +15 K

Sizing data

- \dot{V} _____ [m³/h]
- Δp_t _____ [Pa]
- Air-regenerated noise
- L_{WA} _____ [dB(A)]

ADLR-A

Variant

- Ceiling diffuser with circular diffuser face

Nominal sizes

- Diffuser face: 244, 300, 356, 412, 468, 542, 598, 654

- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular diffuser face
- Simple installation of the diffuser face due to central fixing screw

ADLR-AR

Variant

- Ceiling diffuser with circular diffuser face
- With connecting frame

Nominal sizes

- Diffuser face: 244, 300, 356, 412, 468, 542, 598, 654

- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular diffuser face
- Connecting frame for installation of the diffuser into vertical ducts
- Simple installation of the diffuser face due to central fixing screw with decorative cap

ADLR-C

Variant

- Ceiling diffuser with circular diffuser face
- With connecting frame
- With butterfly damper

Nominal sizes

- Diffuser face: 244, 300, 356, 412, 468, 542, 598, 654

- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular diffuser face
- Connecting frame for installation of the diffuser into vertical ducts
- Butterfly damper for volume flow rate balancing
- Simple installation of the diffuser face due to central fixing screw with decorative cap

ADLR-*H

Variant

- Ceiling diffuser with circular diffuser face
- With plenum box for horizontal duct connection

Nominal sizes

- Diffuser face: 244, 300, 356, 412, 468, 542, 598, 654
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

Construction features

- Spigot suitable for circular ducts to EN 1506 or EN 13180
- Spigot with groove for lip seal (if accessory lip seal has been ordered)

ADLR-*V

Variant

- Ceiling diffuser with circular diffuser face
- With plenum box for vertical duct connection

Nominal sizes

- Diffuser face: 244, 300, 356, 412, 468, 542, 598, 654
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

Construction features

- Spigot suitable for circular ducts to EN 1506 or EN 13180
- Spigot with groove for lip seal (if accessory lip seal has been ordered)

ADLR-Q-A

Variant

- Ceiling diffuser with square diffuser face

Nominal sizes

- Diffuser face: 593, 598, 618, 623
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

ADLR-Q-AR

Variant

- Ceiling diffuser with square diffuser face
- With connecting frame

Nominal sizes

- Diffuser face: 593, 598, 618, 623
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

ADLR-Q-C

Variant

- Ceiling diffuser with square diffuser face
- With connecting frame
- With butterfly damper

Nominal sizes

- Diffuser face: 593, 598, 618, 623

- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades
- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

ADLR-Q-*H

Variant

- Ceiling diffuser with square diffuser face

- With plenum box for horizontal duct connection

Nominal sizes

- Diffuser face: 593, 598, 618, 623
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air control blades

- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

Construction features

- Spigot suitable for circular ducts to EN 1506 or EN 13180
- Spigot with groove for lip seal (if accessory lip seal has been ordered)

ADLR-Q-*V

Variant

- Ceiling diffuser with square diffuser face
- With plenum box for vertical duct connection

Nominal sizes

- Diffuser face: 593, 598, 618, 623
- Diffuser: 1, 2, 3, 4, 5, 6, 7, 8

Parts and characteristics

- Circular or square diffuser face with fixed air

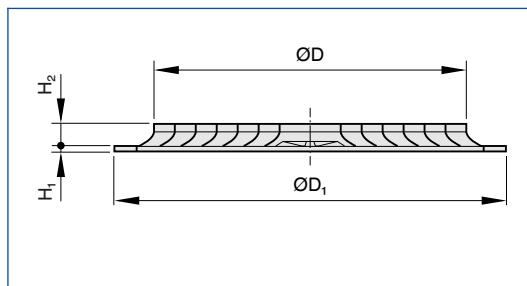

control blades

- Diffuser front frame
- Simple installation of the diffuser face due to central fixing screw with decorative cap

Construction features

- Spigot suitable for circular ducts to EN 1506 or EN 13180
- Spigot with groove for lip seal (if accessory lip seal has been ordered)

$\square Q_1$: 593, 598, 618, 623

Installation in continuous ceilings

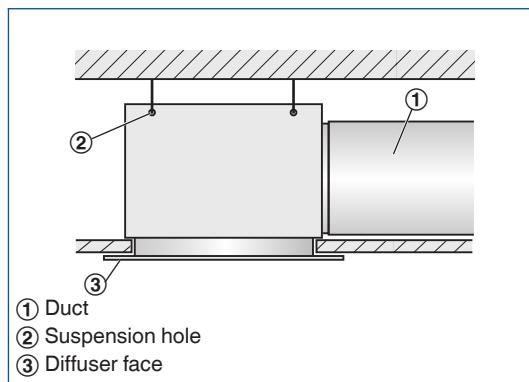

Installation and commissioning

- Preferably for rooms with a clear height up to 4.0 m
- Flush ceiling installation
- Horizontal or vertical duct connection
- If necessary, carry out volume flow rate balancing with the damper blade

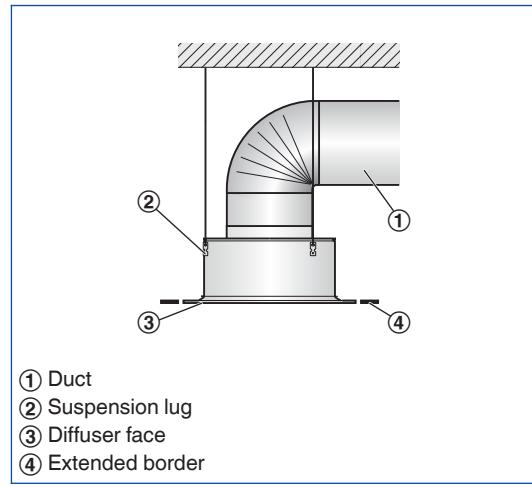

These are only schematic diagrams to illustrate installation details.

Flush ceiling installation with square plenum box for circular diffuser faces

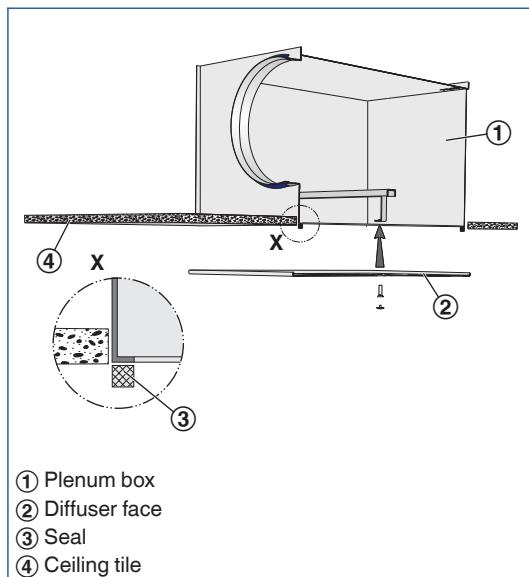

- Horizontal duct connection
- Four suspension holes
- Suspension with cords, wires or hangers, to be provided by others

Freely suspended installation

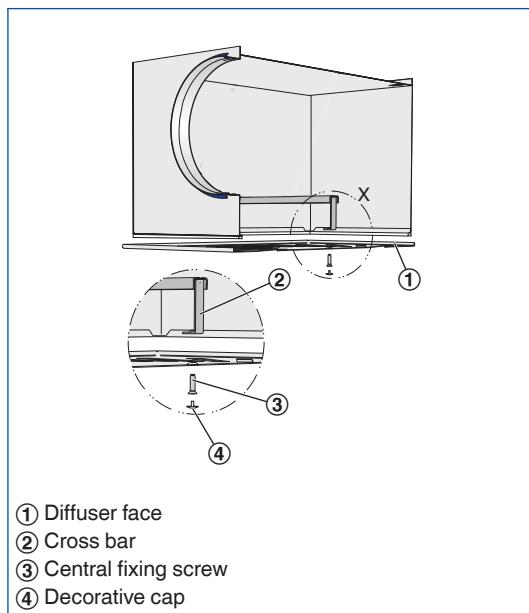

- Vertical duct connection
- Three suspension lugs
- Suspension with cords, wires or hangers, to be provided by others

Diffuser face – sealing

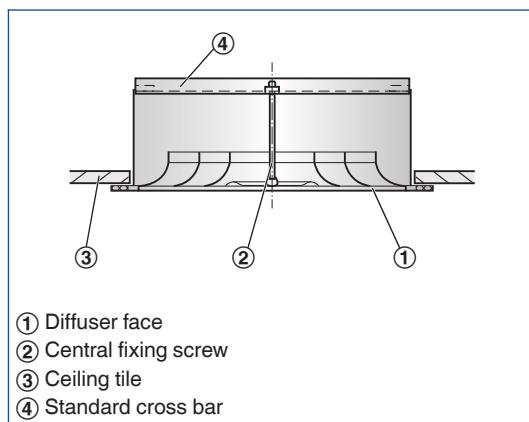

- The self-adhesive sealing tape (supplied) has to be applied to the return edges of the plenum box by others

Diffuser face – central screw fixing

- Using the central fixing screw, fix the diffuser face to the cross bar of the plenum box
- Attach the decorative cap

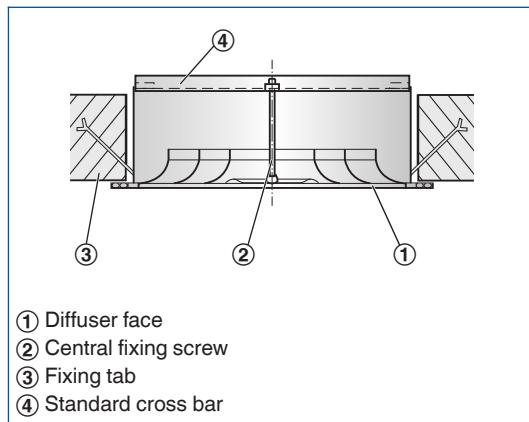

Installation with standard cross bar F0, screw-fixed to ceiling

Only for connections A, AR, AG, C

- No duct connection
- Fixing of the standard cross bar to the ceiling tile is to be performed by others

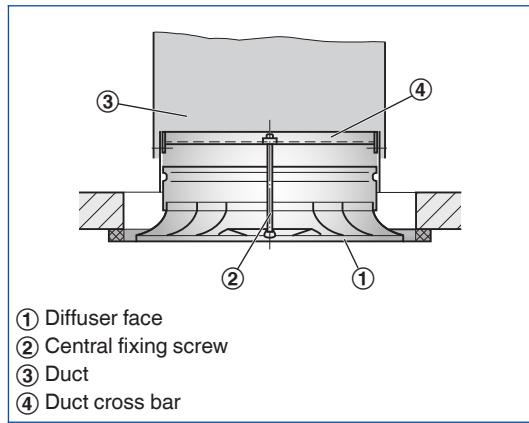

Installation with standard cross bar F0, with fixing tabs mortared in

Only for connections A, AR, AG, C

- No duct connection
- The standard cross bar has to be mortared into the ceiling by others

Installation with duct cross bar D0

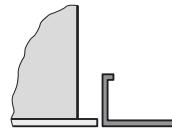

Only for connections A, AR, AG, C

- Vertical duct connection
- Fixing of the duct cross bar to the duct is to be performed by others

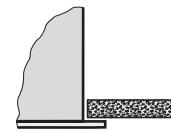

Ceiling systems

Installation into grid ceilings

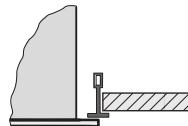

- Fix the plenum box to the ceiling
- The ceiling tile of the grid ceiling is independent of the ceiling diffuser
- Fix the diffuser face after the ceiling has been completed

Installation in continuous ceilings

- Fix plenum box (including diffuser face, if necessary) to the ceiling
- Adjust plasterboard ceiling tile as required
- If necessary, fix the diffuser face after the ceiling has been completed

Installation in T-bar ceilings

- Fix the plenum box to the ceiling
- The T-bar ceiling is independent of the ceiling diffuser
- Fix the diffuser face below the T-bars after the ceiling has been completed

Volume flow rate balancing

When several diffusers are connected to just one volume flow controller, it may be necessary to balance the volume flow rates.

- Ceiling diffusers with universal plenum box and damper blade (variant -M): The diffuser face can be removed to access the damper blade; the damper blade can then be set to any position between 0 and 90°
- Ceiling diffusers with universal plenum box, damper blade and pressure tap (variant -MN): The diffuser face need not be removed since the damper blade can be set with two cords (white and green).

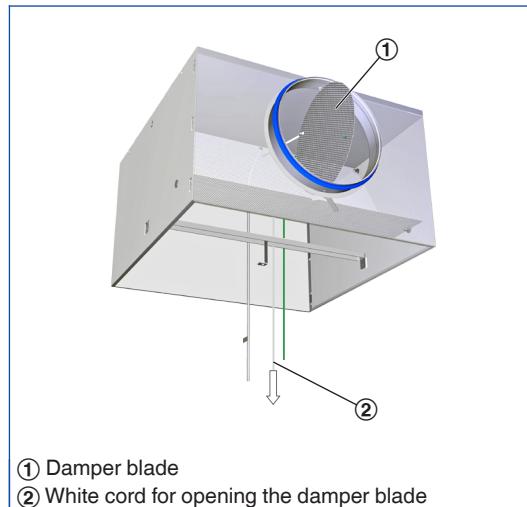

Volume flow rate measurement

Ceiling diffusers with universal plenum box, damper blade and pressure tap (variant -MN) allow for volume flow rate balancing even with the diffuser face in place.

- Connect the measuring tube to the digital manometer
- Read the effective pressure
- Read the volume flow rate off the characteristic or calculate it
- If necessary, adjust the damper blade position with the cords

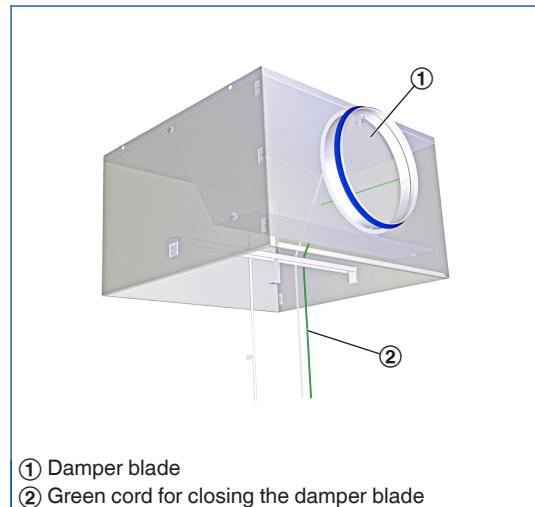

A characteristic is included with each AK-Uni plenum box.

AK-Uni-...-MN Volume flow rate balancing

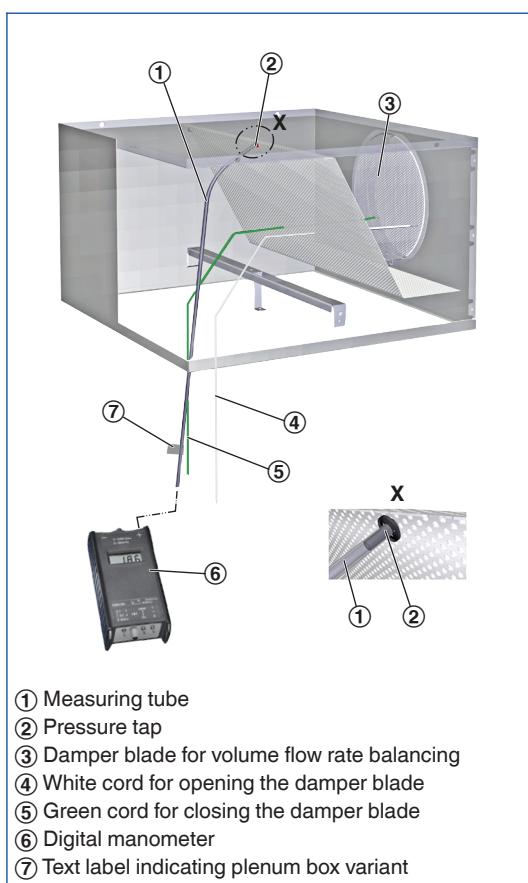

Open, 0°

AK-Uni-...-MN Volume flow rate balancing

Closed, 90°

AK-Uni-...-MN volume flow rate measurement

**Volume flow rate calculation for air density
1.2 kg/m³**

$$\dot{V} = C \times \sqrt{\Delta p_w}$$

Volume flow rate calculation for other air densities

$$\dot{V} = C \times \sqrt{\Delta p_w} \times \sqrt{\frac{1.2}{\rho}}$$

Principal dimensions

ØD [mm]

Outer diameter of the spigot

ØD₁ [mm]

Outer diameter of a circular diffuser face

ØD₂ [mm]

Diameter of a circular diffuser face style

ØD₃ [mm]

Diameter of a circular plenum box

□Q₁ [mm]

Outer diameter of a square diffuser face

□Q₂ [mm]

Dimensions of a square diffuser face style

□Q₃ [mm]

Dimensions of a square plenum box

H₁ [mm]

Distance (height) from the lower edge of the

suspended ceiling to the lower edge of the diffuser face

H₂ [mm]

Height of a ceiling diffuser, from the lower edge of the suspended ceiling to the upper edge of the spigot

H₃ [mm]

Height of a ceiling diffuser with plenum box, from the lower edge of the suspended ceiling to the upper edge of the plenum box or of the spigot

A [mm]

Position of the spigot, defined by the distance of the spigot centre line to the lower edge of the suspended ceiling

C [mm]

Length of the spigot

m [kg]

Weight

Nomenclature

L_{WA} [dB(A)]

A-weighted sound power level of air-regenerated noise

ጀ [m³/h] and [l/s]

Volume flow rate

Δt_z [K]

Supply air to room air temperature difference, i.e.

supply air temperature minus room temperature

Δp_t [Pa]

Total differential pressure

A_{eff} [m²]

Effective air discharge area

All sound power levels are based on 1 pW.
