PLAQUE PLASTER TRIM GRILLE PP-TG-200

PRODUCT DESCRIPTION AND APPLICATION

Airfoil's Australian Made premium Plaque Plaster Trim Grille (PP-TG) offers a sleek, frameless finish that blends seamlessly with modern architectural designs. Designed to sit flush within gyprock, this grille creates a timeless, minimalist look ideal for any space requiring elegant ventilation.

Its innovative design features a 200mm x 200mm square centre plaque that integrates into a black powder-coated metal internal housing with a 143mm spigot. This configuration allows for clean, efficient airflow through the perimeter of the centre plaque while maintaining a flush ceiling finish. Once installed, the centrally positioned spigot secures the flexible duct in place, keeping the centre plaque perfectly aligned with the ceiling line.

The PP-TG can also be powder-coated on request to match any ceiling colour, enhancing its seamless appearance. This grille is ideal for architects and designers seeking a refined, frameless aesthetic that supports modern, clean-lined interiors and exteriors.

The Plaque Plaster Trim Grille combines functional performance with aesthetic elegance, making it suitable for residential and commercial applications in bathrooms, laundries or where discreet, effective ventilation is essential.
